Department of Public Works

## ROAD REPAIR NOTICE

October 29, 2015

### Haverhill Street (Park Street to North Street)

The final coat of paving will be installed starting on Monday, November 2 and should be completed by Tuesday, November 3.

After paving, the Department of Public Works will complete the work by the end of November:

- Repair driveway aprons as needed
- Install loam & grass seed to grassed areas disturbed by construction
- Install berms in selected areas to move water into catch basins
- Install road markings- centerlines, fog lines, etc

Local and through traffic will be impacted by this construction. Signage similar to the initial paving & police details will be used. We recommend that through traffic seek alternate routes during construction to avoid delays. Your patience is greatly appreciated during this time period.

Please contact the DPW in Town Hall at 978-357-5260 if you have questions.
